COURSE NAME: TMJ - - function, dysfunction and therapy

COURSE FACULTY: Dr.Ajit Shetty

COURSE HIGHLIGHTS:

TMJ is a complex joint by virtue of its construction and movement. It is necessary to understand it's construction, movements - planned and unplanned. We need to understand the muscles causing the movement and what could possibly cause problems to the joint. If something does go wrong then can we set it right?

What kinds of dysfunction could occur and what needs to be done to set it right?

Does occlusion play a role?

Use of orthotics in getting things back to normalcy. We will discuss all this and more during the course of the interactive course.
