

PCC 10

COURSE NAME: Unlocking New Insights: Comparative Dental Evaluation and Hand Wrist Radiographs in forensics

COURSE FACULTY: Dr. Srikant N, Dr Shweta Yellapurkar, Dr Nidhin Philip Jose

COURSE HIGHLIGHTS:

By enhancing their knowledge and skills in victim identification, students will be equipped to effectively contribute to the identification process in the aftermath of mass casualty events.

Through hands-on exercises and theoretical instruction, participants will gain a comprehensive understanding of the procedures involved in collecting and analyzing data.

Moreover, the course will delve into the intricate process of comparative dental identification, enabling students to develop expertise in this specialized area.

They will learn how to accurately compare dental records and utilize this information to establish the identities of victims.

Furthermore, the course will explore the use of hand wrist radiographs as a reliable method for estimating the age of individuals in forensic investigations.

Students will gain valuable insights into the interpretation of these radiographs and their significance in determining the age of unidentified victims.

Overall, this course offers a unique opportunity for students to acquire essential skills in victim identification, dental analysis, and age estimation.

By combining theoretical knowledge with practical exercises, participants will be well-prepared to contribute to the crucial task of identifying victims in mass casualty incidents.

COURSE DURATION: 3 Hours

MAXIMUM NO.OF PARTICIPANTS: 25

INSTRUCTIONS TO THE PARTICIPANTS:

Come in with an open inquisitive mind!

COURSE FEE: Rs 1000

INFRASTRUCTURE REQUIRED:

Printing of kits for students, Screen for projection

COURSE COORDINATOR: Dr. Nidhin: 9945010493
