COURSE NAME: My First Implant - Principles & Techniques

COURSE FACULTY: Dr. Aeklavya Panjali DDS, MS, FAGD, DICOI

COURSE HIGHLIGHTS:

Learn the biologic basis and fundamental principles of implant dentistry.

This course is designed for beginners that wish to learn about the surgical phase of implant dentistry for single tooth restorations.

The course will outline the design principles, surface treatments, and other mechanical properties of implants. You will learn how to predictably place implants using guided and non-guided surgery.

Participants will be able to diagnose, plan, and surgically place single as well as multiple edentulous areas with endosseous implants in their practices.

Hands on model workshop will further clarify the concepts.
